# IN A SPIN...

When it comes to spinners, it's not just the Rainbow Windmill that's new for this year! It was love at first sight when we saw the Winter Whirler for the first time. With coloured LEDs round the edge of the disc, the lights appear as solid lines creating a 3D globe effect when spinning. Add to that the bright white snowflake design and you have a fabulous winter-themed unit that's sure to fly out!

THREE STAR BATON

The must-have unit of 2016 was the Cosmic Spinner, with its bright lines of colour and mesmerising weaving movement. 2017's version is bigger, bolder, brighter and altogether better. Coming in mixed boxes, your patrons have three great colours to choose from. We're sure whichever colour they choose, they'll be delighted with the vibrant LEDs and quality finish!

# SOFT GLOW

We introduced some soft glow units to our range last year which have proved very popular. They are products with gentle lighting sequences (glowing, slow-changing or steady-on), well suited for an offering on relaxed performances. Having said that, the soft pulsing and fading light adds a certain magical element which is appealing to all!

E.V.A SNOWMAN NIGHTLIGHT

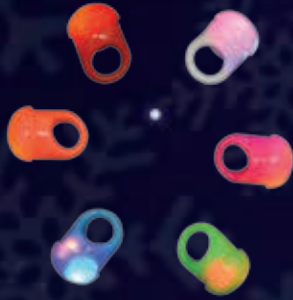

We've increased our 'soft glow' range this year to include the wonderful EVA Snowman Nightlight. Made out of little bubbles which diffuse the various LEDs inside, this unit gives a very pretty, frosted effect as it slowly cycles through the colours.

Standing at about 12cm tall, it's not only a lovely take-home souvenir for your patrons but also a great unit to help dress your sales points and add some winter magic!
